

Applying for Grants and Loans

David Dunn P.E.
WA Dept. of Ecology

1

How can you get *Funding* for your project?

2

Three Steps to get *Funding*.

1. Have an excellent project
2. Have an excellent team to implement your project
3. Understand your funding agency

3

Funding Secret #1: Every Application is really asking 4 questions

- What is the problem?
- Who cares? / Why should they Care?
- What are you going to do about it?
- How much will your solution cost?

4

Funding secret #2: Every application is a sales pitch

You are asking somebody else to spend their money on your project

5

Step 1: Have an excellent project

6

Excellent projects solve problems

- Do you know what problem your project is solving?
- If you don't, this is a warning sign

7

Ask yourself “WHY?”

- WHY?
- WHY?
- WHY?
- WHY?
- Keep asking till you identify your real problem

8

Many projects suffer premature “HOW?”

- Have you ever noticed that every problem looks like a nail when you are holding a hammer?
- Your “project” might not be the solution to your “problem”
- Figure out your problem first, then think about how to solve it

9

How do you solve your problem?

- Alternative analysis / Value Analysis / Cost Effectiveness Analysis
 1. Brainstorm. Get a big list of possible solutions
 2. Evaluate their ability to solve the problem
 3. Look at the costs benefits and lifecycle of the solutions
 4. Pick the Best/ Least Cost/ Highest Value project

10

You call these Alternatives?

11

Hammer Time ??

12

Really brainstorm, go get more alternatives

- Think about scale
- Reconsider your assumptions
- Think about levels of technology
- Consider political and regulatory approaches

13

For capital projects, always consider the Life Cycle Costs (LCC)

- Construction costs (including design, construction management, change order / high bid risk)
AND
- Operations costs (20 years of O&M, normal replacement, financing costs)

14

Yes, Step 1 is basic project planning

*Plans are worthless,
but planning is everything.
– Dwight D. Eisenhower.*

15

Step 2: Excellent Implementation

16

So, you have a brilliant solution to your problem

- Solves the problem
- You can afford it
- Environmentally sustainable
- Perfect in every way

Unfortunately...

17

Brilliance is not enough to get funded

- Everyone else applying has a brilliant idea too
- To get funding you have to prove you can implement
- An idea that has a good chance to become reality becomes a project
- *You are asking us to invest money in your project. If the project doesn't look like it will be successful, why would anyone invest?*

18

Moving from an idea to a project takes a team

- A team is not just a collection of individuals
- Teams work together
- Teams have a shared objective
- Teams understand the project and the problem it will solve
- Teams are committed to the project

19

Who's on your team?

- Utility staff (the project manager)
- Elected officials
- Design Engineers
- Clerk/Treasurer/Accounting staff
- Construction Manager
- Contractor
-
- Have you identified all your team members?
- Are they all on the team?

20

Your team must include "THEM"

- Regulators
- "Stake Holders"
- Utility Customers / Ratepayers
- Neighboring Communities.
- Permitting or review agencies

21

Other success factors

- Environmental Review
- Other funders are on board
- A realistic schedule
- Lots of public involvement
- Elected officials are on board

22

Once you have a great project and a great implementation team, you can start to worry about the funding application

23

Step 3: Know your funding agency

24

Understand your funding agency's perspective and limitations

- What do they want to fund?
- What can they fund?
- What are they prohibited from funding?
- Where does their money come from?

25

What gets funded?

- Brilliant ideas don't get funded
- Awesome implementation teams don't get funded
- Although both of these help...

26

What gets funded?

- Projects that get funded Solve Problems,
For the People Who Have the Money
- Propose your project in a way that solves **their** problems.

27

What if I don't know what their problems are?

- Go Find Out – before you apply
- Ask them directly
- Read their application
- Follow the money
- Understand who the funder is responsible to

28

Sure way to doom your application (don't do this)

- Apply for something the funder is prohibited from funding

29

Can you answer these questions?

- What is the problem?
- Why does the funder care?
- How will you solve the problem?

30

Are your answers clear and concise?

- Put your answers in writing
- Two Sentences per answer
- No more than 20 words per sentence
- No more than 3 commas per sentence
- Written in plain English

31

OK, let's apply for funding

32

Applying for funding

1. Plan your timeline and assign jobs for completing the application
2. Read the application, instructions, and guidelines
3. Answer the real questions
4. Edit your writing
5. Get an independent review, AND FIX THE PROBLEMS
6. Pull Everything Together
7. Deliver it by the deadline.

33

When developing your schedule, remember:

- If it can go wrong it will go wrong
- Work backward from the due date
- If somebody can take longer than you scheduled them for, they will
- Identify critical steps, and due dates
- Murphy was an optimist
- Build in slack where you can

34

Rules for writing:

- KISS
 - 20 words per sentence, no more than 3 commas.
 - Keep simplifying until there is no confusion, and no way to misinterpret
- ~~Eschew Surplusage and Jargon~~ Use short, common words.
- Use the active voice
- Always consider the audience. Sometimes audiences
- Grammar and Spelling are critical
- Use formatting to make reading easy for the evaluator.
- Put the conclusion first

35

Rules for writing: Keep it simple

- Complex sentences and long paragraphs will kill your application
- The reader will zone out, or
- The reader will misinterpret your project

The post-adolescent human male perambulated at a high rate of speed in a pronouncedly down slope direction.

or

The man ran down the hill.

36

What is an executive summary?

- It's a summary, that has been further condensed down for an "executive"
- i.e. its SHORT
- Tell your entire story in 5 sentences
- Never use Jargon

37

Editing and independent review

- These two steps are critical
- Do not skip them
- You are going to need help
- You can't edit your own writing
- I'm serious. Squash your ego. Go ask for help.

38

Let's review:

- Develop an excellent project
- Assemble a great implementation team
- Write the perfect application
- Get edits and reviewer feedback
- Listen to your editors and reviewers

39

What if you don't get funded?

- Find out why
- Correct the problems and try again

40

What if you do get funded

- Celebrate! (but realize the hard work is now starting)
- Contact the funder (early and often) and keep them informed
- The funder has now bought into you.
Your success = their success
- When something goes wrong, ask the funder for help

41

Thank You!
